## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 26-42 are allowed over the prior art of record.

### ***Reasons for Allowance***

2. In applicants' amendment filed October 20, 2005, applicants (now with the assistance of counsel) cancelled all claims and redrafted new claims 26-42 which were exactly identical to the method claims 1, 2, 4-8, 10-14 and 17-21 which were allowed on October 1, 2004 (See Paper # 20040927). Prior to this, on February 15, 2005, the pro-se applicants acting without counsel had filed and RCE and inadvertently amended the allowed claims into article claims. The pro-se applicants had actually intended to file a continuing application under 35 USC 120 in order to claim new subject matter. Applicants new claims 26-42 are intended to bring back the claimed subject matter previously indicated as allowable.

The following is an examiner's statement of reasons for allowance:

While certain prior art of record, such as US Patent 6,268,054 (Costantino et al.), discloses a dielectric layers for multi-layer ceramic capacitors wherein the dielectric material is made up oxide coated barium titanate particles and US Patent 6,078,494 (Hansen), which discloses a capacitor having a dielectric material made of a calcined powder of doped barium-calcium-zirconium titanate with nickel or nickel alloy electrodes, none of the prior art of record teaches or suggests the claimed steps for making the electrical energy storage unit recited in applicants independent claim 26.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
